

BLOUNTSTOWN HIGH SCHOOL

SITE DEVELOPMENT ENGINEERING

PROJECT DESCRIPTION

NFPS' role in this project included the site plan engineering design for the construction of a brand new high school facility which included eight (8) new buildings, sanitary sewer system, potable water system, fire protection system, and a storm sewer system that included one storm water management facility.

This project also involved permitting through Florida Department of Environmental Protection Potable Water Division, and Florida Department of Environmental Protection Sanitary Sewer Division. A Northwest Florida Water Management District Environmental Resource Permit and a City of Blountstown site plan approval were both obtained.

Additional items that were addressed within the design of this new facility were relocating the football field and bleachers, and providing ingress and egress for school buses and student drivers. Construction was completed in 2011.

TOTAL CONTRACT FUNDING
(approximately)

\$25,000,000

PLANNING/PERMITTING

- CONSTRUCTION PLANS
- SANITARY SEWER SYSTEM DESIGN
- POTABLE WATER SYSTEM DESIGN
- FIRE PROTECTION SYSTEM DESIGN
- UTILITY DESIGN & PERMITTING
- STORMWATER MANAGEMENT FACILITY DESIGN & PERMIT APPLICATION

ADDITIONAL SERVICES

- TRAFFIC PLANNING OF NEW INGRESS / EGRESS FOR STUDENT DRIVERS AND SCHOOL BUSES
- PLANNING & RELCATION OF THE FOOTBALL FIEND & BLEACHERS
