

CANNON CREEK FLOOD STUDY ENVIRONMENTAL ENGINEERING

PROJECT DESCRIPTION

NFPS performed a complete hydrology study to determine solutions for drainage and flooding issues affecting roads and property in the Cannon Creek Drainage Basin, which encompasses 3,200 acres in Columbia County, Florida.

NFPS collected topographic survey information, created hydrologic models to determine existing areas of concern, created models to show where improvements can be made to correct flooding issues, created construction cost estimates for improvements, contacted residential and property owners in the area to obtain historical data, assisted in public meetings, and coordinated with necessary permitting agencies.

TOTAL CONTRACT FUNDING

The total for this project was approximately:

\$1,050,000
